

Zero Carbon Yokohama

Based on the implementation measure plan against global warming, City of Yokohama promotes renewable energy-based efforts toward realization of **“substantive zero emissions by the earliest possible time in the later half of the century”**.

Source: Ministry of the Environment

- Maximize introduction of renewable energy into the city.
 - ✓ Corporation with the Council for Promoting Countermeasures against Global Warming, etc..
- Regional partnership
 - ✓ Consideration of energy procurement from Tohoku and/or other areas.
- Blockchain
 - ✓ Establish control technology on energy demand-sides.
- Environmental model zone
 - ✓ Seek progressive approaches in areas around Yokohama where many RE100 companies are gathering.
